Summary

Aspiring Data Analyst and Computer Science student with hands-on training in Excel, SQL, Python, and Power BI. Experienced in data cleaning, visualization, and building dashboards through scholarships and online programs. Passionate about solving problems with data and turning numbers into actionable insights that support business decisions.

Objective

Seeking an entry-level data analyst role or internship where I can apply my skills in SQL, Python, and Excel to real-world projects. Eager to gain practical experience, contribute to dynamic teams, and grow within the field of data analysis by delivering clear, impactful, and data-driven solutions.

Education

Bachelor's in computer science & Artificial Intelligence, Pharos University

Experience / Training

Data Analysis Intern – DEPI
July 2025 – Present
- Applied Excel, SQL, Power BI and Python in projects for data cleaning and analysis.

Courses

- Google Data Analytics Certificate (in progress)
- Udemy: Mastering 4 Critical Skills using Python – Dr. Mostafa Saad Ibrahim
- Excel Course – Mohamed Elassal (YouTube)

Skills

Technical Skills	Soft Skills
SQL (Data Extraction & Queries)	Problem Solving
Power BI (Reports & Dashboards)	Teamwork & Collaboration
Microsoft Excel (Pivot Tables, Charts, Formulas)	Leadership
	Time Management & Self-Learning
Python (Pandas, NumPy, Matplotlib)	Critical Thinking
